

NOTIFICATION PANEL

Alerts are activated quickly & easily using the Notification Panel.

Alerts are delivered to the recipient visually on their smartphone & audibly as a continuous tone (volume & duration adjustable) or read aloud alert.

SAFE

Alerts sent via encrypted TLC connection

PRACTICAL

Operate via an Ethernet or Wi-Fi connection. Battery backup in case of power outage.

EASY

Simple to setup, straightforward to use. You're up and running in minutes.

WHAT IS THE NOTIFICATION PANEL?

Using the Notification Panel, alerts can be activated in a quick and easy way.

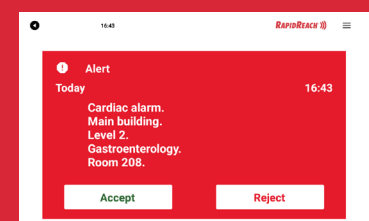

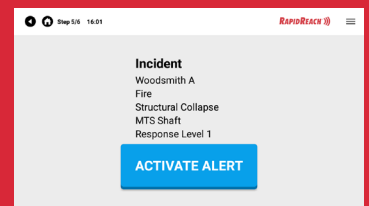

Select predefined alert message sequences to deliver specific information to a recipient. Text boxes are optional, should the alert message require additional detail.

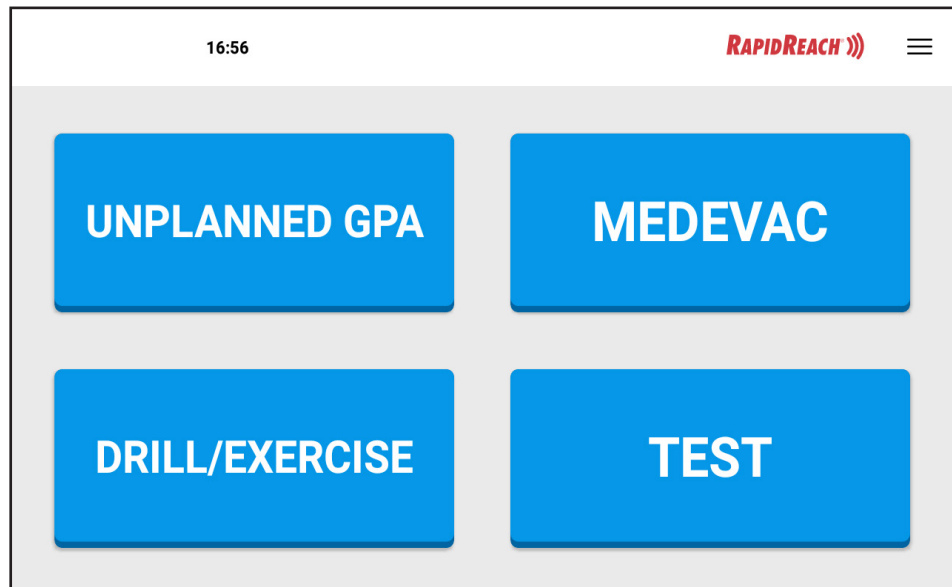

After activation, the monitor screen displays clearly when the alert recipients receive and acknowledge the alert.

Notification Panel can also receive alerts that have been activated from other devices.

Alerts can be delivered audibly or silently. The alert message can even be read aloud.

For lone worker usage, the system can display the location of the person on a map or floor plan.

ACTIVATE ALERTS

Alerts can quickly and easily be initiated from the Notification Panel.

The Notification Panel can be easily configured to meet your alerting requirements.

Scenarios are visible and ready to use on the Notification Panel's home page.

The alert's message can be modified using selection or via free text boxes.

RECEIVE ALERTS

Notification Panel can receive alerts. The alert is displayed on the screen either silently or with an audible tone. If required, the alert message can be read aloud.

Alerts can be for information only or provide a response option.

In the event of a lone worker alert, you can see on a map or site plan where the person is located.

AREAS OF USE

Notification Panel has many uses:

- Mobilise personnel in hospitals
- Ship to shore communication
- Mobilise first aid personnel
- Mobilise rescue personnel on construction site
- Mobilise rescue personnel in mining sector
- Initiate building lockdown
